AQL Defect List for Items

Three types of defect

Critical Defect - A defect that is likely to result in a hazardous or unsafe condition for an individual using the product or that contravenes mandatory regulations.

Major Defect – A defect that is likely to result in failure; reducing the usability of the product and obvious appearance defects affecting the salability of the product.

Minor Defect – A defect that does not reduce the usability of the product but is nevertheless a workmanship defect beyond the defined quality standard.
