

Industrial Wiper Services

**Wipe away  
your cleaning  
worries**

**Choose  
Lindström  
WIPERS to**

**help save money,  
waste and  
the planet.**

# At your disposal for hazardous waste

Our industrial textile wipers and absorption mats are highly effective at absorbing dirt, grease, oil, and solvents, meaning dangerous hazardous waste can be cleaned up quickly and efficiently.

Hazardous waste from used industrial wipers and mats is sent to our service centre's wastewater treatment system in Hämeenlinna, and then onwards to Ekokem Oy for proper disposal. Our service centre is ISO 9001:2000 Standard certified and has been granted the ISO 14001 environmental certificate.

In short, we handle the hazardous waste so you don't have to.

# Cotton for a cleaner conscience

Made of 100% cotton, reusable industrial wipers have more cleaning power than disposable towels. This not only helps you cut back on expenses, but it means you generate less waste too. As a more environmentally-friendly alternative to excessive paper waste, you can rest assured you're doing your part to keep your work environment safe and clean, while helping the planet too.

**Make  
the waste-free  
choice for  
a waste-free  
world**

# Tough wipers for the toughest jobs

Our industrial wipers are 100% cotton, lint-free and highly absorbent. One wiper can clean the equivalent of 5-6 disposable towels. Able to withstand abrasion, our wipers are perfect for demanding cleanup in industrial workshops, car maintenance services, the metal industry – anywhere there is grease, oil, solvents, and hazardous waste that needs to be wiped up quickly and effectively.

Industrial wipers, however, are not suitable for liquids that harden, such as paint, glue, silicone, or glass fiber.

# Max absorption means max protection

Our absorption mats have a wide variety of uses. For example, they can be placed under storage containers or other items to protect the work environment from dangerous leaks and splashes, or used as a clean work surface in assembly or demolition.

Like our industrial wipers, our absorption mats are made of cotton and are highly absorbent. They efficiently absorb grease, oil, dirt, solvents, and other liquids, cutting back on final clean up.

# Why buy when you can rent?

With our service, there's no need to invest in stock, deal with storage, or worry about maintenance or laundry.

We'll also help you analyse how many wipers and mats you'll need so that you will always have enough on site, clean and ready for use. We collect used wipers and mats, launder them, and safely dispose of any hazardous materials that have been absorbed, following regulations. We can also do customer-specific waste reporting upon request.

**ASSESSMENT OF NEEDS,  
DESIGN AND PURCHASE**

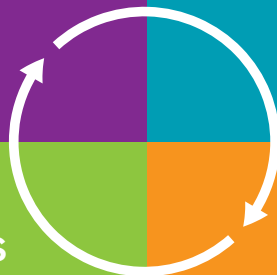

**LAUNDRY AND MAINTENANCE**

**STORAGE AND  
DISPOSAL OF PRODUCTS**

**DELIVERIES  
AND PICK-UPS**

# Professional tools always on hand

To ensure you don't run out of fresh mats and wipers, we also provide distribution and collection containers for both the industrial wipers and the absorption mats. The containers, which follow all fire and security-technical regulations, make it a snap to get clean wipers and mats to you and collect dirty ones after use.

## Industrial wipers

Industrial workshops and maintenance, car and service workshops and other industrial use.

## Absorption mats

Industry, workshops and maintenance.

## Metallic distribution and collection container

Clean wipers are in the top section of the container, whereas the lower part is reserved for used wipers.

## Metallic transport and collection container

with wheels for the safe transport of clean and used wipers and absorption mats. Fireproof and complies with the regulations related to the transport of dangerous substances.

## Distribution and collection container

Made of HD polyethylene for the transport of absorption mats.

## Storage rack

For clean absorption mats.
