

Infection laundry

– yellow laundry bag

Guidelines for handling infection laundry

1. Empty the pockets.
2. Place the infection laundry in a washable plastic bag. Seal the bag carefully.
3. After this place the plastic bag inside a yellow cloth bag. Seal the bag carefully.
4. Let your customer manager know that you will have infection laundry. This way we can prepare for it in our distribution and in our laundry.
5. If you do not have the washable plastic bags or yellow cloth bags, please ask us for them.
6. In exceptional situations, we may arrange for deliveries of infectious laundry in rolls and separately protected and marked, but this must always be agreed with us.
